

## NOTES ON PUREBIOTICS™ EQUINE USE

The following are some of the reports and thank you letters from users of PureBiotics for horses. Also see the studies, information and other reports on the millions of animals, poultry and fish that have benefited from PureBiotic use.

It is incredibly rewarding for all of us at PureBiotics to see how much help we are to our animal friends. In addition to our personal viewpoints, an important factor for breeders & farmers is that "Healthy animals are happier and do better overall", providing owners with far more use from their animals as well as major savings in costs.

### EQUINE REPORT: HORSE: SATIN – EYE INFECTION (UTAH RANCH)

**From:** Craig Perry **Subject:** Satin's Eye Infection

These photos are after applying PureBiotics for only two days later!!! Amazing results. Thank you so much, Craig

Above - Satin's Eyes-Before PureBiotics & Satin's Eyes After PureBiotics

**Subject:** Fwd: Another testimonial

Dear Lino,

This is another incredible story about Chrisal. As you know, Craig is an attorney and said it was fine for you to use the below testimonial he just sent me. You have his permission to include his name. Regards, Dr. Dave

----- Forwarded message -----

**On Thursday last week, our most**

valuable horse, and arguably the best Curly Missouri Foxtrotter in the world, gave birth to a special palomino filly.

We were overjoyed. A few hours later, my wife noticed that this little filly had two eye infections! We think the infections came from the belly of her mother, who was shedding profusely in the warming spring air and the hair, with its dander, got in the filly's eyes.

So I told Lisa, why not try the PureBiotics Concentrate. She had confidence in the product as we have seen many miracles with this product already (it has become our "Liquid" BandAid to fix all kinds of problems). She mixed a diluted solution with a human saline solution and rinsed out the filly's eyes.

We have had many eye infections on the little ranch; the normal course of care is antibiotics for several days, at least a week. It is expensive to boot. Then of course we have to give them antibiotics afterwards.

Almost immediately one of the eyes cleared up. The other eye, however, was particularly nasty. My wife said, "If this works on the other eye, I will be singing praises about this product!" In the interim her Dad had called, being his cynical self, and started to make her feel she should not be so sure about this product.

The proof is in the pudding. In less than 24 hours, the PureBiotics had completely ELIMINATED the eye infection! It saved our special new filly from pain and discomfort, and preserved her immune system at a vulnerable time (one day post delivery!). No expensive antibiotics, time consuming procedures (ever tried to give a shot to a foal? They hate you for weeks, breaks down the training time to make them comfortable around humans).

My wife is still in joyful shock at the results. We know it is absolutely from this miracle liquid because we have dealt with this many times before. My wife is singin' praises!

**Craig Perry, Esq.**

-----  
Team, we just received photos today of the foal, which is a filly named Sahara.

It is easy to see why she was so named and it brings a smile to our faces to know we were able to help such a precious animal with PureBiotics.

As soon as we have time, we will make a gallery of all the photos people send us of all the animals we have helped with Chrisal PIP.

**LGM**

From: Craig Perry To: Lino Morris Subject: Re: PHOTO

You need to come over some time for a horse ride. Here is the link to my wife's horse ranch.

All of our horses are going to benefit from this product (the StaBiotics™ from PureBiotics™), I am convinced of that.

On Wed at 10:52 AM, Lino Morris <[Lino@linomail.com](mailto:Lino@linomail.com)> wrote:

My God what a lovely filly and easy to see why so named. Thank you so much for the photo, it makes us feel wonderful that we were able to help.

Best regards, Lino

From::attorney Craig Perry To: Lino Morris Subject: Re: PHOTO

My wife is already a PureBiotics convert when she saw the results with clearing the eyes. I use the products several times a day. Trying the shower gel the past three days. It knocks out under-arm body odor, amazing. I use the spray on my pillows. I have not been able to breathe through my nose at night, or through both nostrils, ever, although the Neti pot helps but it's laborious, and Afrin--what a nightmare that stuff is. But now, it's much easier. My nose is always clear and the amount of mucous my nose generates is very low.

I've had a cough the past month, it is clearing up now. The PureBiotics really helps with that, too. Looking forward to more great results. Craig

## THE NEW JERSEY EQUINE CLINIC

With "A Tradition of Excellence" The New Jersey Equine Clinic is a state-of-the-art equine medical and surgical center well known and referred to for providing the highest quality of medical and surgical services to the equine industry. The NJ Equine Clinic has been testing and using the PureBiotics under your old PIP name with great success (and you know that those other people relabeled your products and then sold it as a private label!). Located on 130 acres in the rolling pasture in western Monmouth County, the New Jersey Equine Clinic, with a staff of some 24 doctors and care specialist offers supervised post-operative care as well and has been serving a discriminating clientele for 32 years.

PureBiotics and its StaBiotic™ and CGI products is honored that The New Jersey Equine Clinic, which is known for their caring, professional and ethical manner, had chosen to first test and then use our products for years in their work to provide the highest quality veterinary service to the equine industry in a within a mutually supportive work environment.

In a report from the people working with the equine clinic on their use of PureBiotic's Chrisal brand, the comment was: ***"I have to say that the staff at the NJ Equine Clinic loves how well PIP works and sings PIP praises all day long!"***

### PHOTOS BELOW OF RESULTS USE:

These big, heavy mats at the Equine Clinic collect a great deal of odor and moisture and therefore an ideal breeding ground for bacterial growth and mold. You can see how well StaBiotics® PIP is cutting through all the build-up.

Before StaBiotics® PIP

After Starting StaBiotics® PIP

*\*It can be seen how in short order, StaBiotics® is starting to eat through all the biofilm buildup*

CUSTOMER NAME	LOCATION	TYPE OF LOCATION	PROBLEM IDENTIFIED	STABIOTIC PRODUCTS USED	CURRENT STATUS
<b>ADDITIONAL GROUP OF EUROPEAN HORSE FARMS USING STABIOTIC &amp; RESULTS</b>

## **FERDY - PHOTO OF THE HORSE CLINIC WEST OF BRUSSELS**

**TO PROVE THE DIFFERENCE BETWEEN STABIOTICS™ AND OTHER PRODUCTS, IN THIS TEST - HALF THE TREATMENT FLOOR AREA WAS CLEANED WITH THE HORSE CLINIC'S STANDARD VETERINARIAN "BIOCIDAL" CLEANING PRODUCTS (LEFT SIDE) - AND ON THE OTHER HALF (RIGHT SIDE) OUR PUREBIOTICS® PIP PROBIOTIC (STABIOTIC®) FLOOR CLEANER WAS USED.**

**As can be seen, the difference in cleaning with StaBiotics® PIP is easily seen and culture samples of the floor proves that PureBiotics' StaBiotic® products provide days on ongoing protection where all regular cleaning and disinfectant products stop protecting the moment they are dry.**

Note that in Germany, where StaBiotic® PIP Horse Products are sold under a private label, the product is doing extremely very well in shops there. Team, we will try to copy over all the information on PureBiotics® use for horses to one central file as soon as possible - but also note the huge amount of data from hundreds of farms using our PureBiotic® Products for years with perfect results for all types of animals from dairy cows to poultry and pigs - as well as major use in fish farms, including for extremely expensive prize winning Koi Fish... and for zoos and animal facilities for everything from hippos to tigers. It should also be of major interest that use of StaBiotics™ in hospitals have resulted in reducing the risk of infections by up to over 90% and for the facilities that have switched to our products, the overall infection rate even with all the in and out traffic is normally reduced by some two-thirds, which is a massive figure (and this is just using our cleaning products without the major additional weapon of our fogging and HVAC treatment.

## NOTES FROM EXCEL RACING & JC to sort through:

Rudy DelGuidice, the President and Head Trainer The Excel Racing Stables, hates Chemicals like Pine Sol & Bleach and loves the way PureBiotics® reduces the effort of cleaning his stables.

He is visiting an extremely important owner Thursday who's horses are suffering from Pharyngitis. If not taken care of properly, he stands to lose hundreds of thousands of dollars. He really wants a video or how well PureBiotics work and wants our team to film on-site.

Parangitus - He will test 5 horses with the best Horse Vet when he returns and wants to evaluate the scoping tests.

Pharyngitis – viral Viral pharyngitis is inflammation of the pharynx (the part of the throat between the tonsils and the larynx).

### Causes

Most sore throats are caused by viral pharyngitis.

Pharyngitis may occur as part of a viral infection that also involves other organs, such as the lungs or bowel.

A **farrier** is a specialist in equine hoof care, including the trimming and balancing of horses' hooves and the placing of shoes on their hooves, if necessary. A farrier combines some blacksmith's skills (fabricating, adapting, and adjusting metal shoes) with some veterinarian's skills (knowledge of the anatomy and physiology of the lower limb) to care for horses' feet.

## Exams and Tests

Your health care provider usually diagnoses pharyngitis by examining your throat. A lab test of fluid from your throat will show that bacteria (such as group A streptococcus, or strep) is not the cause of the sore throat.

### Treatment

There is no specific treatment for viral pharyngitis. You can relieve symptoms by gargling with warm salt water several times a day (use ½ teaspoon of salt in a glass of warm water). Taking anti-inflammatory drugs or medications, such as acetaminophen, can control fever. Excessive use of anti-inflammatory lozenges or sprays may make a sore throat worse.

It is important NOT to take antibiotics when a sore throat is due to a viral infection. The antibiotics will not help. Using them to treat viral infections helps bacteria become resistant to antibiotics.

With some sore throats (such as those caused by infectious mononucleosis), the lymph nodes in the neck may become very swollen. They may be treated with anti-inflammatory drugs, such as prednisone.

Rudy say all Horse owners use Chemicals, but want to get away from Chemicals & go green, but there has not been anything out there until the wonder that the racing stables and all our other groups have benefited from.

Young horse are dealing with inflammations.

1. GI - Gastro Intestinal
2. Respiratory - allergy, inflammation pre & post exercise
3. EIPH - most important is cleaning up

Rudy wants to reduce Dust Mite allergens to control Upper Respiratory challenges such as Pharyngitis, as it reduces their performance and therefore the horse's value.

Following are his cleaning habits

#### 1. Stalls

- Cleaned once per week
- He plans to clean with Heavy Duty, spray it off
- Will try getting a Fogger & use Daily between 7-10:00
- Wants to cure Upper Respiratory probably caused by Dustmites & Dust (research this)
- Would like a Horse Cleaner (Extra Fogging PEC can also be diluted to sponge on horses) Now that I found a mixing unit to hook up to the hose & can use exact amount of PIP to spray directly onto horses, he feels it might be perfect, especially for coats.
- Wants to be able to clean the buckets they drink

For the last visit we replenished the following Products:

- 1 Gallon All Purpose
- Case of 8 oz Probiotic Concentrate with no labels- PEC
- 8 oz of Heavy Duty
- New 200 ML scent free – and he LOVES it for his boots, shoes, pillows, bed & clothes
- 50 ML spray
- Toothbrush Cleaner - he also LOVES IT
- He really wants BodyWash to eliminate the smells that spook horses

#### 2. Skin

- Skin irritations & spotting cause the value of a horse to drop
- Antibiotics are costing him a fortune that PureBiotics eliminate
- He hates using Chemicals to clean.
- He wants to reduce infections
- Horses also get fungus during hot times especially
