

PureBiotics™

THANK YOU LETTERS

TESTIMONIALS & REFERENCES

Because PureBiotics® has now proven over the last ten years in over 35 countries around the world to be the much-needed break-through solution for HealthCare and Cleanliness for so many thousands of people, pets and animals, we have received thousands of thank you letters and reports about how our PureBiotics® (Probiotic) Products have helped so many. We are sharing some of them with you here for you to better see what PureBiotics® can mean for you...

So easy, safe and economical to use, there are thousands of applications for PureBiotics® covering • Personal Home Care & Cleanliness • Reducing the risk of infections in hospitals & medical facilities • Food processing facilities • Restaurants • Beauty care • Pet care for dogs, cats and all animals & fish • Major agricultural use for all types of farm animals • From reducing death in chickens to reducing mastitis in dairy cows - protecting all of us everywhere...!

PureBiotics® provides you with a large range of personal & institutional examples of how PureBiotics® have been applied “in the real world”. See how PureBiotics® incredibly effective, next generation solutions can make your life so much easier, healthier and change it for the better. Breathe cleaner air - and touch your world with safety again...!

THANK YOU, LETTERS & REFERENCES

Personal & Institutional Examples Of Stabiotics™ Use

PureBiotics® and its StaBiotic® Products are the Breakthrough To Healthcare, Medicine and Cleanliness that Disinfectants and Antibiotics Were To Medicine... For thousands of years' humans have been trying to improve ways to clean themselves and their world around them. Today, we find ourselves endlessly battling for the balance between protection and using dangerous, germicidal chemicals that harm ourselves, our children, our animals, our waters and the environment.

PureBiotics® is the needed break-through solution – an incredibly effective, next generation, “best” possible solution - already proven in over 20 countries around the world to economically replace all the things that smell, itch and burn with a gentle genie proven in FDA licensed laboratories and in thousands of tests to be safe for skin, eyes and breath, yet more effective than the strongest hospital products. And, PureBiotics is a great blessing for allergy and asthma sufferers...!

The following are a mix of just some of the “Thank You” letters, endorsements and reports about our StaBiotic® Products. In any document released for public use, the last names will only be initials, but when references are needed, many have agreed to be contacted. Until then, do not use any of these without written permission.

PureBiotics Reduces Bacteria at AIDS Clinic

At our HIV clinic, the PureBiotics StaBiotic products reduced the amount of Staphylococcus Aureus at least 95% compared to normal cleaning products..... We have now switched cleaning materials to StaBiotic™ cleaning products and fully endorse these products for all medical facilities and other facilities where safety is important.

Noah Lee D.O. Medical Director, Midland Medical Clinic, Ft. Lauderdale, Florida

PureBiotic™ Mist Allergy Free Spray Provides Fast Results For Skin Problems

I had a terrible skin condition for a very long time and after just three weeks of using Allergy Free PureBiotic Mist on and around my bed, I no longer have itchy skin or red allergy spots on my body. This product really does work for me. I can live now without worrying or problems. I truly believe it can work for others as well!!!

Ms. Arta M, Ontario, Canada

PureBiotics Helps Optician Controls Nurse Wife’s Long Term Allergies

My wife, who is a nurse, suffered for 20 years from coughing fits just before bedtime. After trying every medicine and treatment known without any success, I secretly sprayed the StaBiotic Spray on our bed and in the areas my wife frequents. Much to my amazement, my wife no longer coughs and has been sleeping without any problem... This product is truly amazing. You truly made believers in me and my wife.

Optometrist Norman Weiner, Jaffe Eye Institute, Aventura, Florida

Subway Franchisee See Fantastic Results With PureBiotics Cleaning Products

We first tested Stabiotics cleaning products for several months at our Subway Franchises and were so impressed that then have continued to use it for the past two years and are pleased to say that our floors (which get heavy traffic and spillage) are remarkably clean. After using the StaBiotic sanitary cleaner in our bathrooms, we have noticed that they smell

great and clean much easier than before. Additionally, we all have seen that our restaurants now sparkle more, are cleaner and smell better too. I never thought that we would rave about a cleaner, but we all really love your StaBiotic products and will be endorsing them to all other franchisees.
Larry Cohen, Owner, Subway Franchise Palm Beach Gardens, Florida

SAVING THE WORLD...

THE WORLD'S HONEY BEE CONUNDRUM – TESTING THE PUREBIOTIC SOLUTION..!

The crisis the world is having with our declining bee populations is a major worry to every country in the world now and all are praying for a solution as the negative impact to our world could be swift in just a few more years.

The Solution Is Nature Itself - in the form of PureBiotics' StaBiotic Bee Therapy..!

PureBiotics was asked by our Canadian Distributors in Alberta if the PureBiotics' StaBiotic solutions could be part of the solution. After initial testing in Europe proved promising, PureBiotics teamed with the largest Honey Bee hive keeper in Canada, Scandia Honey, whose operations cover some 14,000 hives. Scandia is considered one of the top organizations in the country and for the first phase of testing, has been testing PureBiotics on bees for the first year's study in a two-part operation. The first step is to provide the safety of protecting the bees by adding PureBiotic® Concentrate to the bee's sugar water for drinking and for spraying their hives for a range of benefits to provide a package of total protection.

The first groups of bees tested proved extremely promising. Bees seem to get livelier and have more energy when PureBiotics is use. This same affect for the first round of initial trials was also observed in Europe as well. Then, after the start of full testing, during just in the first year, the first full testing results has exceeded expectations, as follows:

HONEY BEE REPORT FROM SLENDER FARMS & SCANDIA HONEY: The independent 3rd party testing harvested the bees without any PureBiotics' personnel present for a fully impartial test and recorded 4 scores: **Honey production, chalkbrood, overall health and frames of bees**, as follows:

- a) PureBiotics™ demonstrates that if you improve the bee's overall health, then everything else improves.**
- b) Honey production was 33.7% higher than the control bees.**
- c) Health (scored by the owner of the largest Canadian hive company) was 24.7% higher...!**
- d) And, the frames of bees (important BEE REPLICATION) was 31.9% higher!**
- e) In the leaf cutter test**, they extracted the bees last week and sent samples to the reference laboratory which proved full success in lowering chalkbrood. Total chalkbrood [**Chalkbrood, a fungal brood disease of honey bees**], (sporulating and nonsporulating) in the treated bees **was .67%**. This is a very low number considering where the bee population was when the tests started. The control sample was 1.24%. **PUREBIOTICS DROPPED THE CHALKBROOD TO 54% OF THE CONTROL BEES..!**

The quote from the Alberta, Canada team representative, Brian Slenders, was: **"I am just stoked. I think we have found something big here gentleman."**

The Scandia Honey team that controlled the 1st direct testing of PureBiotics on the bees

Spraying the bees by hand

Misting Using Aerosol Cans

Local Beauty Queen Uses PureBiotics For Skin & Deodorizer

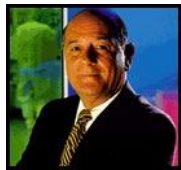

I love to use PureBiotics on my skin. Anytime I have any bumps or any kind of irritation on my face or body, PureBiotics makes my blemishes go away in just a day or two instead of a week like other products.

I recently won the Miss Russia Beauty Contest at Sunny Isles Beach and the PureBiotics spray helped keep me cool and calm under pressure. As an added advantage, PureBiotics spray helps keep me smelling fresh when I really begin to sweat under the hot lights. I also noticed that I don't cough so much since using PureBiotics.

Daria V., Sunny Isles Beach, Florida

David Levy, CEO of a Public Company

My wife and I have had major problems sleeping for years as we have terrible allergies. On the very first night that I used the PureBiotics Mist Allergy Free Spray, it was the best night's sleep I had in years. Both of us now have total relief and we do not travel without our PureBiotics Spray! The only problem is that we now have to check in our luggage until they make smaller travel size PureBiotics Cans.!

David Levy, Delray Beach, USA & Rio de Janeiro, Brasil

Uses PureBiotics to Protect Home While Husband Has Chemo Therapy

The PureBiotics products give me peace of mind to avoiding exposure to harmful contaminants. We have noticed a huge difference in the smell and freshness in our home and feel safe while my husband undergoes chemo therapy. It is also great to use on our cats. We now take PureBiotics spray with us on our trips to ensure we are protected.

Joe & Betty Valls, Miami, Florida

MOTHER OF THREE BOYS, ONE WITH ASTHMA AND A GIRL

Being the mother of three young boys and a girl, with lots of friends, meant that keeping the bathroom clean and smelling fresh became for me the 'extreme challenge' until PureBiotics Cleaner came into the picture. It is the only cleaner that I have found that really cleans away the bad smells in the bathroom.

More important, our younger son suffers greatly from asthma, which obviously causes great distress in our family. Creating a healthy home for him has been my goal. The PureBiotics StaBiotic Cleaners and Allergy Free Spray have proved a God sent for me. I now clean our whole house with PureBiotics Cleaners and spray not only our sons' beds but even their clothes with the PureBiotics Mist and in times of sickness, their hands and skin. I have seen a real drop in the amount of our

son's asthma attacks – and I am now convinced that PureBiotics ProBiotics are "ProHealth"! **Melanie Shalom, The Negev Desert, ISRAEL**

The University of Ghent & Lokeren General Hospital, Belgium

Originally the Lokeren General Hospital and the University of Ghent funded in part by a grant from the Government of Belgium did one and a half year study of the StaBiotic products in order to try and reduce the very serious problem of secondary hospital infections. **THE TESTING DONE OVER 18 MONTHS INCLUDED OVER 5,000 TESTS** and even cleaning alternating floors of the hospital with Stabiotics and standard hospital cleaning products. The results were that each time the cleaning products were switched, the floors using the StaBiotic Products had a “DRASTIC REDUCTION IN THE LEVELS OF THE RISK OF INFECTIONS DETECTED” by laboratory testing. the results were incredibly clear that simply using StaBiotic products for cleaning produced incredible results.

Dr. Landeghem, the head of infectious control for the Lokeren General Hospital, Belgium.

*KEY NOTE: Since the 1.5 year study of PureBiotics ended, the hospital has never stopped using PureBiotics Products and is **now rated as one of the top ten Hospitals in the country with the least amount of infections.***

740 BED HOSPITAL DID THOROUGH TESTING OF STABIOTICS BEFORE USING

MJHH - The Miami Jewish Home and Hospital for the Elderly is one of the finest and cleanest facilities of its type in the United States. We did a very thorough scientific test of all of the StaBiotic cleaning products; initially in nine (9) areas of the MJHH Facilities and everyone from the infectious control people to our sanitary people were totally amazed at the excellent results.

You can see from the study report we wrote on this that the photos of the before and after pathogen cultures show how Stabiotics could save millions of nosocomial (secondary hospital) infections annually – which means the ability to save many tens of thousands of lives per year - and saving hospitals hundreds of millions of dollars.

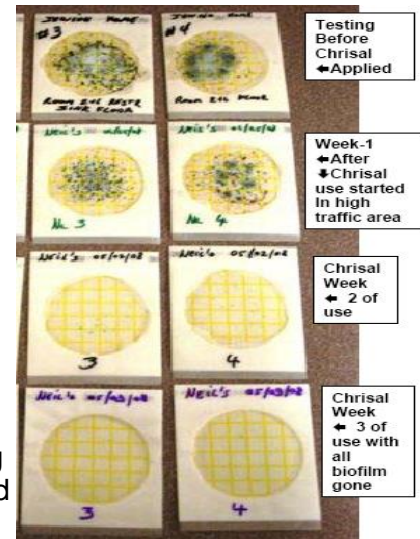

Neil Caseiro, Director Environmental Services & Special Projects

Important Note about the Technology behind PureBiotic Products

NATURE’S FIST - PROBIOTIC POWER Stabiotics is a probiotic solution that actually “safely Controls the Environment” of any surface the Stabiotics cleans..! PureBiotic Products truly protects against the risk of contamination and lowers the risk of harmful bacteria, eliminates the biofilm that protects dangerous organisms along with trapping dirt - and actually cleans far better and easier than anything else.

PureBiotics’ Stabiotics are totally safe and University and hospital Testing over the years in thousands of applications show the incredibly impressive results of using Stabiotics in every corner..!

In the photos to the right, areas in the 740 bed MJHH Hospital are cultures taken before using Stabiotics - and then weekly after using the PureBiotics Products. In less than 10 days, the PureBiotics had eliminated years of biofilm that protected harmful bacteria and kept protecting non-stop in all the months since as each moping protects for up to three days. NOTE the cleaning was done in the morning and the testing done later in the day after hundreds of people used the areas... but the PureBiotic products still worked...!

OVER 90,000 PATIENTS OVER 800,000 PATIENT DAYS:

A recent Pear Review Publication of a key hospital study of some 90,000 patients over 800,000 hospital patient days showed that there was not one single negative results of using Stabiotics products on patient.

UNIVERSITY STUDY OF OUR PROBIOTIC / STABIOTIC PRODUCTS SHOW VAST AND RAPID RESULTS IN CONTROLLING RISKS:

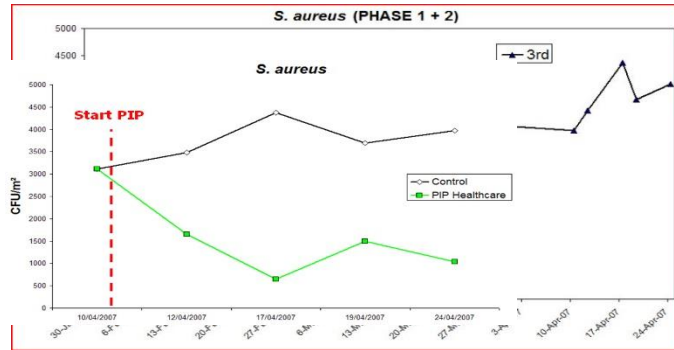

Chart Shows MRSA Reduction With Probiotics ↑

↑ In the university and hospital tests above it can be seen that as soon as our probiotic cleaners were applied, the unwanted high level of contamination immediately dropped. THEN, when the use of our probiotic cleaners was stopped, the contamination level rose again as the weeks passed without our probiotic cleaning use. ... *What would this mean to you for your homes, family, pets, restaurants, hospitals, when traveling, etc...!?*

Young Girl With Horrible Allergies For Years Coins The Phrase: “STABIOTICSIT..!”

I am writing this email to you to express my great admiration for your PureBiotics product. As you know, my 14-year-old daughter has been plagued with horrible allergies for the past several years.

We have tried everything from traditional over the counter medicines to allergy shots to relieve her congestion as well as chronic itching. Nothing worked until you suggested we try Stabiotics. You were so kind to come over and show us the correct application. We diligently followed your procedures and were amazed at how Melissa's symptoms seemed to all but disappear.

It's been probably almost a year now since we have been using the Stabiotics. Most miraculously, I never needed to prod Melissa into spraying PureBiotics in her room or on her bed. I truly believe that the relief she received from the PureBiotics was incentive enough for Melissa to take responsibility for her own care. What's even more amazing is how Melissa is such a fan of PureBiotics now that she tells all of her friends that they need to be "STABIOTICSED" (for the ProBiotics-In-Progress Explanation of how the products work) and that she found new ways to use PureBiotics. Pimples now have a new enemy in PureBiotics...! Thank you again and I hope that others discover the amazing PureBiotics Spray. Very sincerely, **Marcia and Melissa S., North Miami Beach**

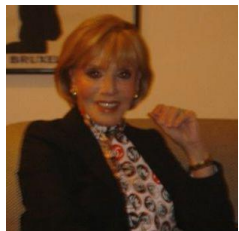

After Almost 90 Years, Exchanges Alcohol and Clorox For PureBiotics..!

Most people never stop to think that the groceries they buy have been handled by many people who may have not washed their hands and it is amazing how dirt is carried into homes on shoes. Because of these and other such examples, all of my life I have been aware of how simple it is to pass on infections. Millions of people get sick each year thinking it is a “stomach bug” when it really is food poisoning. Therefore, I have always wiped down my groceries with alcohol and used Clorox to clean everything, though the fumes are horrible. Once I saw how simple and wonderfully PureBiotics worked and did a much better job of cleaning than all my other cleaners, I switched 100% to PureBiotics and now never worry anymore. I also use the PureBiotics Allergy Free on my bed to get rid of my nagging cough I have had for over 50 years. Sincerely, **Bobbe Gluchowsky**

Physician and Wife Both Find Relief With PureBiotics Spray

I am writing this letter to tell you of the experiences my husband, Dr. Robert R. and I had with your spray product PureBiotics Allergy Free. I had been having problems with coughing and being congested for a very long time and could not get any relief no matter what I tried.

My friend with major breathing problems has been using PureBiotics for the past year, spraying her bed, chairs, etc. and told me that she now almost no breathing problems and is able to sleep through the night. So she gave me a can and I followed her instructions and within days I was not coughing anymore and I was sleeping better. I have been using PureBiotics for several months now I feel like a weight has been lifted off of my chest.

My husband uses a special belt to help him shed weight and this belt caused a very nasty looking rash that would not go away. When he saw the results with PureBiotics spray and asked me to spray him with it. I did and within a few hours the rash was gone! We were both amazed. Several weeks later he told me about a fungus on his toe that would not react to any type of treatment so we tried the PureBiotics spray to see what it would do and by the next day it was gone! We both cannot thank you enough for this wonderful product. Very truly yours, **Roz R.**

INSURANCE COMPANY EXECUTIVE

Thanks for letting us try PureBiotics. I also gave the PureBiotics Spray to my son, who has blemishes, and it seems to have cleared up his face in just a few days. Impressive. **Mark C.**

SOME EXAMPLES OF PUREBIOTICS USE FOR FAMILY PETS

PureBiotics Helped My Golden Retriever Much Better Than A \$360 Vet Bill..!

Great news! My lovely dog, Lila Rose, was suffering from a very bad "allergic" condition on her abdomen and chest. She was treated off and on with Cortisone and Antibiotics for this very bad mange on her skin and the vet even once had her wear a cone, but it did not help.

Ever since we started using the PureBiotics Allergy Spray on Lila, she no longer has these allergies, and her abdomen and chest are free from breakouts. Most importantly we stopped giving her the medications ordered by the veterinarian. This product is amazing!

Thank you for introducing PureBiotics to us! **David & Clemencia S.**

ENZO CURED FLOPPY EARS PROBLEM PLUS NO MORE ODORS OR STAINS...!

I wanted every dog owner to know how well the PureBiotics Allergy Free Spray worked on my dog, Enzo. As you can see from the photo, he is beautiful, but his ears flop over and keep fresh air out and this causes him to get a lot of ear infections. MY groomer told me that everyone should take their dogs to the vet to for help.

But, I thought about How the PureBiotics spray had helped so much for us at home, so my wife and I gave him a little spray in each ear and checked his ears the next morning. The infection was gone and his ears looked fine. He now gets sprayed once a week and we have not had any problems for all the months we have been using PureBiotics.

PureBiotics also does wonders for odors too. Enzo found something horrible outside to roll around in and came in the house with a terrible smell! We know the PureBiotics spray removes odors so I sprayed him all over and in a few hours the smell was completely gone with no bath needed. Another reason to love this great product.

Thank You So Much For Helping Both My Son, Rafael, And My Dog Dolly

For a number of weeks my dog Dolly, a black Labrador, had terrible sores that would not go away and the poor thing was scratching all the time. I took Dolly to the vet several times and tried all of his expensive prescriptions to no avail. I tried a number of other things, but nothing worked.

I was introduced to PureBiotics Allergy Free spray by a friend and thought I would give it a try. The vet had said that maybe Dolly's problem might be some kind of an allergy, but I was still very surprised to see that Dolly stopped scratching within just a few hours of using PureBiotics! I am now using the PureBiotics Allergy Free every few days and the sores are gone and so is the scratching. I use the spray on her

ears, spraying a quick spray once a week and the redness that used to occur several times a month is also gone.

Then, when my son developed a rash that would not respond to the normal creams, I decided to try the spray on him as well and the rash was gone in just one day! So, Dolly, Rafael and I can't thank you enough for this great product, especially during these tough economic times.

Thank you, **Isabel C., Hallandale**

CASSIE, PET COCKATOO AND 3 ROOMMATES LOVE STABIOTICS

My Umbrella Cockatoo, Cassie, loves to be sprayed with PureBiotics. I spray the PureBiotics Allergy Free on my parrot, Cassie, her cage and perches. Cassie ruffles her feathers for me while I mist her with the PureBiotics so I can get the spray down to her skin.

The PureBiotics is very smoothing to her and makes cleaning her so easy (as she normally hates water). The STABIOTICS results in less dust and leads to less allergic reactions, like coughing and sneezing. But another huge thing that everyone loves is

that PureBiotics just totally eliminates the odors. We use the PureBiotics on our beds and the three of us girls spray it on when we go out dancing to stay fresh. We are all thrilled with our StaBiotics. Thanks from all of us. **Mariya G., Aventura**

RESPIRATORY THERAPISTS

RESPIRATORY THERAPIST USES PUREBIOTICS STABIOTICS ON HIS DOG AND SELF

Dear sirs, I would like to tell you about my experience with PureBiotics allergy free Stabiotics spray. My dog was suffering an allergic reaction to something in the house which was causing her to sneeze and cough continuously. I'm in the medical field, a director of respiratory therapy at a local hospital, and I recognized she was in trouble and was going to take her to the emergency room at the vets. But, I had been introduced to your PureBiotics StaBiotics product at the hospital and PureBiotics has been working so well there that I decided to use it on my doggie before I went to the Emergency Room.

Within just a half hour of using PureBiotics, it was unbelievable. All the symptoms went away and ever since that night my dog has not had an episode like that again.

Now we spray both the bedding and the dog lightly to prevent a recurrence of the allergic reaction. Also I used the product on my self when I recently had a sore throat from singing at a recent concert and I sprayed with StaBiotics and within one day my sore throat went away. Thank God for your product. Very truly yours, **Carlos Redios, Respiratory Therapist**

Respiratory Therapist With Serious Allergy To Dust Mites

Dear Sirs, I was told about PureBiotics StaBiotics Allergy Free spray by one of the girls I work with as a respiratory therapist in the hospital. I have a very bad allergy to dust mites and it was very hard for me to breath and sleep at night. This then made it very hard for me during the days, as I was always stuffed up. Several months ago I started using the PureBiotics StaBiotics Spray and noticed good results within just the first week where I could finally breath at night and it was easier for me during the day too. I now spray my bed and fabric chairs every other day and when I change the linens I spray the bedding too. I can breath!

I am telling everyone at work about how it has helped me. Thanks again for helping me. My husband thanks you too! **Maria Ulysses, Respiratory Therapist**

Another Respiratory Therapist With The “Highest Test Score For Allergies”..!

Dear PureBiotics, I was someone who tested the highest score you can test for dust mite allergies and it made my life terrible. I work as a respiratory therapist in a hospital that uses PureBiotics products and was given a can of PureBiotics StaBiotics Allergy Free spray to try when they found out how horrible my allergies are. In fact, my allergy is so bad I was washing my sheets every night before bed - and I still could not sleep through the night.

The first night I tried the StaBiotics spray I got some relief and by the third night I was not washing the sheets and I was sleeping through the night! I have been using the PureBiotics StaBiotics spray for many months now and I am like a normal person, I just don't have the problems any more.

I did try not using the spray for a while and found that the allergy was coming back so I went back to spraying and that took care of the problem. I have told some of the other people in the department that have problems about my results and I know some others are already trying PureBiotics. Thank you so much for such a wonderful product. **Florida Valera, Respiratory Therapist**

Respiratory Therapist With Dust Mites Allergies Breaths Well With PureBiotics

I want to tell you of my experience with PureBiotics StaBiotics Allergy Free Spray. I work at a hospital as a respiratory therapist and I know how people struggle to breath and how good it feels to do so without having to work at just being able to breathe.

I have dust mite allergies and I am always trying to find products that will let me breath through the night. Another therapist at the hospital told me about your product and the great results she was having using PureBiotics StaBiotics, so I thought I would give it a try.

Well, it worked better than I could hope for. I started about 4 months ago and actually got some real results the very first night and by the end of the first week, I was sleeping through the night. I haven't done that for years.

I spray my bed and my chair every other day and I now find that I can breath easier during the day time too. So, thank you so much PureBiotics for making my life easier!

Wynel Hanes, Respiratory Therapist

UKRAINE – The City Of Kiev Medical Burn Centre Beats Infections With PureBiotics

The Kiev Medical Burn Centre issued a report on StaBiotics Healthcare cleaning in the burn centre located at 13, Krakovskaya street, Kiev, Ukraine. Since April 3rd, 2008 the Kiev Hospital Trauma Centre-2 Burn Centre for the treatment of burning wounds has cleaning with PureBiotics StaBiotics Healthcare cleaning products. Before going on to more critical areas, the clinic tested the first round of testing in non-sterile areas such as patient rooms, halls, stairwell, toilets, bathrooms, offices and other such areas - then with the results successful, PureBiotics products were then also tested and evaluated in the Trauma Centre for burn wounds.

The two separate divisions selected for the PureBiotics StaBiotics trials were the burn wound unit for adults and the septic shock reanimation unit. These units were selected because they are used most intensively and because of their high bacterial contamination. Samples before and after the introduction of PureBiotics StaBiotics products were done to properly test and prove the efficacy of the StaBiotics Healthcare products and PureBiotics was totally successful in reducing MRSA and other contamination problems...!

The Kiev Medical Burn Centre, Kyiv, UKRAIN

Head of The Computer Crisis Center Suffered for Years With Major Allergies

I maintain major computer systems throughout South Florida for major companies, law firms, medical groups and other critical operations and suffering from allergies can make work difficult, but do everything I can to stay healthy and even still surf with my sons and stay lean and in shape. But no matter what I have tried over the years, I still suffer terribly from allergies.

One of my clients has PureBiotics and gave me a bottle to try. The results was so startling that I now use all of PureBiotics' products to both clean my house, spray my bed and areas and keep a can in my truck. There has been a major improvement in my breathing and I noticed that all my stainless steel and other areas in the kitchen and home stay much cleaner with greater ease. The fact that PureBiotics has no harsh smells and works so well is a great additional benefit. Sincerely, **Ed Delano, CEO, C.C.C**

REGISTERED NURSE, CCRN, CMC & SON USE OF PUREBIOTICS ALLERGY FREE

I just wanted to let you know how much better my son and I feel since we have been using the STABIOTICS Allergy free product as directed on the linens and around the house. StaBiotics has worked very well in decreasing my son's allergy symptoms. He's not sneezing anymore in the mornings! I also wanted to let you know how fantastic your PureBiotics cleaning products are. I have been using the floor cleaner, and the water comes up black!! The bathroom cleaner is absolutely fantastic, and the general cleaner is awesome as well.

I work in a hospital as a nurse, and I know these products would really benefit a hospital environment and cut down on nosocomial infections. I really appreciated you letting us try your wonderful products. Thanks again, **Laura Kleinkort, RN, CCRN, CMC**

HIGH SCHOOL TESTS PUREBIOTICS WITH GREAT SUCCESS

The Burley High School

A controlled test was done at an Idaho High School where a number of areas in the school were tested with culture media to detect harmful bacteria – and as expected the athletic areas showed high contamination along with bathrooms and other sites. An example of PureBiotics's effectiveness was that in the Wrestlers Locker Area – the results of using PureBiotics' StaBiotics Cleaning Products provided almost total control of all the Staph infectious colonies found in only 2 weeks – as well as removing dangerous biofilm.

TERRIBLE CHRONIC SKIN PROBLEMS FOR 15 YEARS RELIEVED WITH PUREBIOTICS

I have suffered from a chronic undiagnosed skin condition that causes horrible itching that has been attacking me for some 15 years now. Each attack lasted months. During these attacks, which can last for months at a time, the extreme itching is a 24 hour a day problem so I get very little or no sleep at all.

I have been to doctors all over the country praying for a cure, but never with any decent results. I was even on anti-depressants to reduce the strain on my life. I was even taking 2 hour baths each day with some kind of special solution to try and quell the problem. Upon hearing about PureBiotics from my brother, I immediately asked to try the StaBiotics spray. We sprayed my arms first to see if the PureBiotics' StaBiotics might help - and in less than 5 minutes the itching on her arm was gone!

I was so thrilled to have my horrible itching gone wherever sprayed PureBiotics that I had to use it immediately all over my body in all the other areas that itched - the PureBiotics kept taking away all the pain and itching.

We spray my bed and favorite chair every three days. Within days of starting to use PureBiotics, I no longer have any of the itching, which is a miracle for me - and now I am totally drug-free of all my other medications! Thank you so much, **Rose Ross, NMB**

QUARTERDECK RESTAURANT

I was originally approached to test the PureBiotics product line at our Quarterdeck Restaurant in North Palm Beach and agreed to a trial. Once we started using PureBiotics, the grime on the floor started to break up after only a few days and the floors lost their slippery texture. Once the test went well, we expanded the use of PureBiotics throughout the facility. The results were amazing.

← **Top of photo = regular cleaning & bottom part used PureBiotics..!** The kitchen floors cleared up in days, the heavy grease buildup from the grill and fryers was dramatically reduced in the first week and disappeared by the end of week two. Our table tops were squeaky clean and our cutting boards were re-whitened and dramatically cleaner. The overall impression of my staff for the products was outstanding. They all

loved the ease of use and the fact that the product was completely neutral to human touch. Using PureBiotics's STABIOTICS Cleaners has given us a number of advantages including cleaner, more sterile environments, ease of use, fewer products to have to use, lower costs, an environmentally friendly product and ongoing protection. Sincerely, **Justin Mezick, Assistant General Manager**

THE ROKAVIAR STURGEON FARM USES PUREBIOTICS FOR HEALTHIER FISH

Sturgeons around the world are sought after for their prized caviar. Unfortunately, sturgeons take five years to grow to maturity in order to be able to produce caviar. Therefore, keeping these fish healthy is a major factor.

Rokaviar, which first tested PureBiotics for months, has just placed it's fourth order with PureBiotics for another 3,000 liters of PureBiotics' StaBiotics Pond Plus. The Rokaviar Sturgeon Fish Farm in Homestead is a 17 acre facility with a huge investment in fish and facilities. In addition to being a

viable business, Rokaviar functions as a genetic reserve for dwindling species as well as reduces the fishing pressures on wild stocks with a capacity to hold over 1,200,000 gallons of water with fish stocking densities over one pound per gallon of system water. The additional facilities and new fish processing and packing center will significantly expand the operations and will use PureBiotics for protection as well.

WORLD FAMOUS INTERKOI FISH FARM FIRST TO USE PUREBIOTICS

InterKoi is the prize winning breeding and growing fish farm in Europe who's fish won prizes as the best in the world. Just one single Koi Fish can cost over 50,000 Euros (some \$70,000!) – so whatever is used by Interkoi to grow and protect their prized stocks of fish is very carefully screened.

The Company's probiotic products was intensely tested and then happily used by fish facilities, especially when it was seen that using POND PLUS on the fish cured wounds and infections far faster than anything else..! The products are now in use for years at

Interkoi.

ASTHMA SUFFERER NEVER WORRIES ANYMORE STARTED PUREBIOTICS IN MIAMI

I have suffered from asthma for many years and have been on many medications. Any cold or flu can be a major problem for me. I have been instructed by my physician, Dr Jaime Landman, to start using a nebulizer with xopenex if I even imagine I am getting a cold to help prevent having to resort to using predisone due to my asthma. When our friend Rudi brought us some PureBiotics' StaBiotics Allergy Free Spray from Belgium in November of 2007, it was hard to believe it would work, but in just days after starting to spray PureBiotics, I started to feel better and stopped coughing all the time and started sleeping well. By January, I was feeling like normal people do and stopped using most of my medications. I now have been using StaBiotics for many months and have no wheezing or coughing and no sinus infections anymore.

This is truly miraculous. With PureBiotics, it is the first time in 20 years that if I catch the sniffles, I do not have to be prescribed antibiotics, prednisone or use a nebulizer. This made my husband decide to get involved with PureBiotics. Today is Thursday, July 17 and I saw Dr. Landman's Physician's Assistant, Ellen, to document my well-being. More miracles of miracles. Dr. Landman's office performed a pulmonary function test and compared it to last November, 2007 when I visited for a well-being follow-up for prescriptions. My pulmonary functions are higher now on with a cold than they were in November. We were astounded. It was the first doctor's visit in years they did not have to prescribe antibiotics, prednisone or nebulizer use. I have a copy of all of my records to show as I want to help others.

Sharon Z., North Miami Beach, FL

AIRPLANES & HELICOPTERS CLEANED WITH STABIOTICS (Plus Bullet Train)

There are a number of major advantages for using PureBiotics products for cleaning aircraft as PureBiotics' Airplane Cleaners are extremely effective and efficient so that the actual job time to clean each airplane goes faster and, extremely important to note, is that the PureBiotics cleaners are safe for the cleaning people to use and safer for the environment. In addition to the airlines, PureBiotics is used by the military and PureBiotics already has been tested and certified for approved for use on Boeing and Douglas aircraft and PureBiotics has 9 testing certifications to date, including a Sabena test report. Note that PureBiotics is also used on the high speed "Bullet Train" in Europe.

ARGENTINA AGRI-GROUP WITH DAIRY FARMS AND FOOD FACTORIES

PureBiotics' Animal Products were tested by VERONICA, the fourth largest producer of dairy farms and dairy products Argentina. Mr. Sanchez, the manager of the dairy farm testing PureBiotics animal products line stated that the staff were all very much astounded by the strong cleaning results of PureBiotics probiotic products and easy to see the major advantages to farmers by using PureBiotics.

JOGGER'S RASH TREATED WITH PUREBIOTICS STABIOTICS SPRAY

like many joggers, I use a sweat belt. However, no matter what I do to protect my skin, I keep breaking out in rashes by the end of my jog. These are very annoying and both itch and tend to burn. Once I started spraying with PureBiotics, the itching and red marks were soon gone. Thank you, **Ann Gordon**

THE USE OF PUREBIOTICS IN A GERMAN AGRICULTURE CENTER

Testing of PureBiotics STABIOTICS Products proved very impressive in lowering the risk of infections and to provide a great deal of improvement of facility hygiene using the probiotic products. The products are

better, safer, easier and more effective cleaning is most important for agricultural facilities. For details, see the complete report from **Hendrik van de Sand, LWZ Haus Riswick, Nordrhein-Westfalen, Germany**

LATIN HOUSEWIFE AND STUDENT

June 22nd, 2008, TO WHOM IT MAY CONCERN, As a Latin I tend to take hygiene to the extreme and I was taught by my mother that to keep something clean you needed to disinfect and kill everything. That is why the concept of PureBiotics took a leap of faith for me as it was a big switch mentally for me to get rid of my bleach, my Fabuloso and other cleaners to replace them all with the PureBiotics' StaBiotics products. Also, when I saw how little of the PureBiotics concentrate was needed, I was very skeptical about what the product would do. But, then I saw it with my own eyes.

That was when I became a true believer, especially when our dog regurgitated on our new couch. I just wiped it up then cleaned the spot with the PureBiotics interior spay and as soon as the spot dried up there was NO SMELL WHATSOEVER! The same thing happened when the puppy urinated on our carpet. PureBiotics is fantastic, not only can't we smell where it was anymore but neither can the dog, which prevents her from going back and turning it into a bad habit. I do not know of any product out on the market that can do what PureBiotics' products do and on top of that be absolutely safe for both surfaces as well as the environment.

We have been using the PureBiotics spray on our bed for more than a year now. It is reassuring to not have those nasty little dust mites in our bed and one thing we noticed is that whenever either one of us is sick, the other didn't catch it like before. Also those black spots on the in the bathtub disappeared! To me that shows my guests and family that even though I am a fulltime student and model, I do a thorough cleaning job and that makes me very proud. Once you see how powerful PureBiotics is, no one would ever consider buying anything else! PureBiotics really is a bottled miracle! Sincerely yours, **Paula M.**

SPRAYS SELF, MATE AND CAT WITH PUREBIOTICS STABIOTICS ALLERGY FREE

You're going to laugh when you hear this, but one of the biggest changes that I've noticed with PureBiotics is with our cat, Bella. She's been sneezing and snotty since we moved to Florida, but since I started spraying her face and around her dish and litter box with the PureBiotics, she's been doing much better. Donny also noticed improvement with his sinuses when he gets up in the morning since we started spraying our pillows and mattresses. My sinuses have been better. PureBiotics does really help! I'll take pictures and email them with a letter soon. **Melissa R.**

Hospital LPN QI/Risk Manager Coordinator Uses PureBiotics STABIOTICS To Help Breathing

Hi there, just wanted to let you know that I have noticed that I haven't been wheezing at all since I started using that spray. I did stop using it a few days ago and I got up this morning at 4am with a really stuffy nose, so I guess this stuff really works. I'm going to start spraying it again. So tell the fellows from PureBiotics that it does work from my stand point and thanks for leading me to StaBiotics. Also please tell them to let me know when the cleaning products will be available for sale so that I can buy some to also try them for cleaning my home. Thanks once again. April 29, 2008.

Anne Castroverde, LPN QI/Risk Manager Coordinator

TREMENDOUS IMPACT PUREBIOTICS MAKES IN HELPING FARM ANIMALS

In North America, PureBiotics has proven it makes a huge impact in the health of animals and thereby greatly increases the profits of farmers and lowers costs and staff time. However, in 3rd world countries where costs are so crucial, PureBiotics has proven to be a God sent for both animals and farmers.

Incredibly easy and economical to use, just look at the study started on July 15, 2006 at both the Dubrovskaya and Tersalgaiskaya Farms where there were a number of sick and injured cows. When one of the wounded cows was started on PureBiotics treatment, at 17 hours the same day, the veterinarian noticed that the infection on the wound was getting smaller; the animal was able to step on the injured foot. The wound could be examined. In all cases where PureBiotics was used there was improvement.

The cows treated were returned to health and were left alive and did not have to be

slaughtered. The first example cow (photo on right) started giving milk again. **Veterinarian Alekseyev Iliya Aleksandrovich**

HORRIBLE EXPERIENCE MADE BETTER WITH PUREBIOTICS

I had a horrible experience last month that turned into an incredible one. I had to go to the hospital because I could not breathe and my temperature went over 40 degrees Celsius, in a few minutes I was completely full with sweat, it was a very serious problem. My colleague took me to the hospital and we found I had pneumonia and that my principal lung was nearly half filled with fester. I was transferred immediately to the intensive care department of the hospital. They hooked me up on several liquids and antibiotics. But I was not getting better. Being in the hospital was scary and I remembered about all I heard how much hospital bacteria was a problem and I remembered the story about when Corrie's granddaughter only got well after using the probiotic products, so I asked Jos to bring me a can of the Allergy Free spray to spray all over me and around my bed and by the next day I finally started getting better. The doctors were very surprised at my fast improvement. **Rudy Cruysberghs**

DOCTOR FINDS PUREBIOTICS GREATLY HELPS HEALING BURNS

I severely burned my leg on a motorcycle. Aside from the normal problems healing any trauma, burns can easily get infected and can also produce extensive scarring.

After two weeks, the burn was still scabbing and not healing. I was told about PureBiotics and started spraying my leg with it and within just a few days, amazingly my leg fully healed without any scarring. This is an exceptional product. **Dr. Arnold M.**

GRANDDAUGHTER'S RASH

My daughter Brandy came to visit with her husband and our grand daughter, Haily, had a bad rash on her bottom. She was on several different ointments from the doctor for over 3 weeks and it was getting worse. We had her stop the ointments and only use PureBiotics. Within 24 hours you could see the difference and after a week the rash had cleared up & healed. Also, we use PureBiotics on my son, Bradley and his friends and it really seems to cut down on everyone trading colds like they normally do.

Also, the PureBiotics cleaning products have been incredible and a God sent for keeping our dog clean as well and odors just go away..! I am telling the world about PureBiotics. **Brenda Beasley**

HOUSEWIFE USES PUREBIOTICS ON THUMB FOR FUNGUS

My thumb had been hurting me for a couple of weeks. When my manicurist took the dark polish off we found a fungus infection on my thumb. She suggested I use a special product that she had and told me it would probably take at least 6 months for me to see an improvement. She also told me to make an appointment with the skin Doctor. I started spraying StaBiotics twice a day on my thumb and the pain subsided within a couple of days. After spraying for 2 weeks I can already see the nail starting to improve. StaBiotics has saved me a visit to the skin doctor for a prescription that many times doesn't even work.

EX-HUSBAND PROVIDES PUREBIOTICS STABIOTICS SPRAY

I have given the PureBiotics Allergy Free Spray that works so well to both my sister who is a doctor (as well as her husband) and also to my ex-wife who has a real allergy problem. She takes care of my son so I want her to be healthy. Both my physician sister and ex-wife have both reported real improvement with

their respective allergies by using PureBiotics, albeit my ex is still allergic to me..! Thanks, Clig, N.Y.

FROM THE LETTER BAG: July 15, 2016 – from Elena S. from Dover, MO: We received our order. Thanks, we love the product and use it daily and share the info with our friends.

SEE STUDY SHOWING MAJOR SAVING TO DAIRY FARMERS BY USING PUREBIOTICS

There is an excellent study by Spring Creek Logistics showing that even a minimum size dairy operation can save at least \$70,000 a year by switching to PureBiotics. In addition, there are a number of other added savings in expenses and staff time by reducing the number of sick cows – as well as adding the additional profits from increasing milk production so that the final benefit to such a farm could be double that number and in some cases as high as \$250,000 a year. In the case of big dairy

operations, for one specific organic herd, the amounts of money that would be saved by using PureBiotics was some \$50,000 a day and that group is currently finishing up the full testing of PureBiotics with the aim of starting use as soon as possible.

In addition to the many millions of dollars saved with PureBiotics, there are also the important benefits to the environment as PureBiotics is truly a “Green” product.

ONE OF THE COUNTRY’S LARGEST FOOD MARKETS FEATURES PUREBIOTICS

The Buford Highway’s farmer’s market in the Greater Atlanta, Georgia Area is a tourist attraction in itself and features international foods from all over the world. With some 150,000 square feet of actual store floor space and supported by a 70,000

three story high warehouse, the store’s owners proudly feature PureBiotics products and just recently sold a container load of PureBiotics Allergy Free Spray to Korea where students use the products on their beds to assure the best possible night’s sleep so that their bodies and minds are best set to learn. It is felt that all athletes should use PureBiotics’ StaBiotics.

PUREBIOTICS PHOTO LIBRARIES – FERDY ANIMAL PHOTOS

And note that a list of 50 farms in Europe using PureBiotics’ StaBiotics products is available

Soon PureBiotics will hang thousands of photos of PureBiotics StaBiotics Products in use on the web. In the meantime, the attached link has close to 300 PureBiotics animal use related photographs available to see. These photos show the before and after PureBiotics use for chickens, cows, sheep and pigs. There is an available explanation list for each photo.

TESTED PUREBIOTICS IN HOME - AND DOG - PLUS OFFICE AND WAREHOUSE

I have been using PureBiotics at home, in our offices and the cleaning company has used them in our warehouse. Linda, my wife's cleaning lady has found the products to be effective and I appreciate very much there is no odor from the residue. In the office bathrooms the tile grout has lightened considerably. I also had a great success cleaning up our French boxers green vomit accident on our cream colored carpet. It worked great. There is no doubt you have a terrifically effective product.

Sincerely, **Gene G.**

HORSES - NOTES ON EQUINE PUREBIOTICS USE

The following are some of the reports and thank you letters from users of PureBiotics' StaBiotics for horses. Also see the studies, information and other reports on the millions of animals, poultry and fish that have benefited from PureBiotics use. It is incredibly rewarding for all of us at PureBiotics to see how much help we are to our pets and animal friends. In addition to our personal viewpoints, an important factor for breeders & farmers is that "Healthy animals are happier and do better overall", providing owners with far more use from their animals as well as major savings in costs.

EQUINE REPORT: HORSE: SATIN – EYE INFECTION (UTAH RANCH)

From: Craig Perry **Subject:** Satin's Eye Infection

These photos are after the proper application, only two days later!!! Amazing results.
Craig

Above - Satin's Eyes-Before PureBiotics STABIOTICS
PureBiotics STABIOTICS

Satin's Eyes-After

Subject: Fwd: Another testimonial

Dear Lino,

This is another incredible story about PureBiotics. As you know, Craig is an attorney and said it was fine for you to use the below testimonial he just sent me. You have his permission to include his name. Regards, Dr. Dave

----- Forwarded message -----

On Thursday last week, our most valuable horse, and arguably the best Curly Missouri Foxtrotter in the world, gave birth to a special palomino filly.

We were overjoyed. A few hours later, my wife noticed that this little filly had two eye infections! We think the infections came from the belly of her mother, who was shedding profusely in the warming spring air and the hair, with its dander, got in the filly's

eyes.

So I told Lisa, why not try the Water Plus. She had confidence in the product as we have seen many miracles with this product already (it has become our "Liquid" BandAid to fix all kinds of problems). She mixed a diluted solution with a human saline solution and rinsed out the filly's eyes.

We have had many eye infections on the little ranch; the normal course of care is antibiotics for several days, at least a week. It is expensive to boot. Then of course we have to give them antibiotics afterwards.

Almost immediately one of the eyes cleared up. The other eye, however, was particularly nasty. My wife said, "If this works on the other eye, I will be singing praises about this product!" In the interim her Dad had called, being his cynical self, and started to make her feel she should not be so sure about this product.

The proof is in the pudding. In less than 24 hours, the (PureBiotics Water Plus labeled as) ProBioPlus had completely eliminated the eye infection! It saved our special new filly from pain and discomfort, and preserved her immune system at a vulnerable time (one day post delivery!). No expensive antibiotics, time consuming procedures (ever tried to give a shot to a foal? They hate you for weeks, breaks down the training time to make them comfortable around humans).

My wife is still in joyful shock at the results. We know it is absolutely from this miracle liquid because we have dealt with this many times before. My wife is singin' praises!

Craig Perry, Esq.

Team, we just received photos today of the foal, which is a filly named Sahara.

It is easy to see why she was so named and it brings a smile to our faces to know we were able to help such a precious animal with PureBiotics.

As soon as we have time, we will make a gallery of all the photos people send us of all the animals we have helped with PureBiotics StaBiotics.

LGM

From: Craig Perry To: Lino Subject: Re: PHOTO
You need to come over some time for a horse ride. Here is the link to my wife's horse ranch.

[zions gait curlies](#) All of our horses are going to benefit from this product (PureBiotics), I am convinced of that.

Lino Morris: My God what a lovely filly and easy to see why so named. Thank you so much for the photo, it makes us feel wonderful that we were able to help.

Best regards, Lino

From: attorney Craig Perry]Sent: To: Lino Morris Subject: Re: PHOTO

My wife is already a PureBiotics convert when she saw the results with the eyes. I use the products several times a day. Trying the shower gel the past three days. It knocks out under-arm body odor, amazing. I use the spray on my pillows. I have not been able to breathe through my nose at night, or through both nostrils, ever, although the Neti pot helps but it's laborious, and Afrin--what a nightmare that stuff is. But now, it's much easier. My nose is always clear and the amount of mucous my nose generates is very low.

I've had a cough the past month, it is clearing up now. The PureBiotics really helps with that, too. Looking forward to more great results. Craig

THE NEW JERSEY EQUINE CLINIC

With "A Tradition of Excellence" The New Jersey Equine Clinic is a state-of-the-art equine medical and surgical center well known and referred to for providing the highest quality of medical and surgical services to the equine industry. The NJ Equine Clinic has been testing and using PureBiotics' StaBiotics products with great success. Located on 130 acres in the rolling pasture in western Monmouth County, the New Jersey Equine Clinic, with a staff of some 24 doctors and care specialist offers supervised post-operative care as well and has been serving a discriminating clientele for 32 years.

PureBiotics was honored that The New Jersey Equine Clinic, which is known for their caring, professional and ethical manner, has chosen to first test and now use PureBiotics StaBiotics in their work to provide the highest quality veterinary service to the equine industry in a within a mutually supportive work environment.

In a report from the people working with the equine clinic on their use of PureBiotics the comment was: ***"I have to say that the staff at the NJ Equine Clinic loves how well StaBiotics works and sings StaBiotics praises all day long!"***

PHOTOS BELOW OF RESULTS USE:

These big, heavy mats at the Equine Clinic collect a great deal of odor and moisture and therefore an ideal breeding ground for bacterial growth and mold. You can see how well PureBiotics' StaBiotics is cutting through all the build-up.

Before PureBiotics

After Starting PureBiotics

**It can be seen how in short order, PureBiotics is starting to eat through all the biofilm buildup*

As can be seen, the difference in cleaning with PureBiotics STABIOTICS is easily seen

and culture samples of the floor proves that PureBiotics products provide days on ongoing protection where all regular cleaning and disinfectant products stop protecting the moment they are dry.

Note that in Germany, where StaBiotic Horse Products are sold under a private label, the product is doing extremely very well in shops there and also note the huge amount of data from hundreds of farms using StaBiotics with perfect results for all types of animals from dairy cows to poultry and pigs - as well as major use in fish farms, including for extremely expensive prize winning Koi Fish. It should also be of major interest that use of PureBiotics in hospitals have resulted in reducing infections by up to two thirds %.

Dr. David Tamari & Psoriasis

I have psoriasis with the worst part covering my knees and elbows. My family in New York were enthusiastic about StaBiotics and recommended I try it for cleaning my skin. As a physician, I have tried everything for psoriasis, including ultra-violet therapy, steroidal creams and many other treatments including homeopathy, but nothing would take away the horrible itching and even pain.

After getting the StaBiotics spray, later that night at 2 am I woke up with severe itching. I used the StaBiotics spray and was amazed to find that within 15 minutes the itching had dissipated and comparatively had almost instantly relief.

PureBiotics has been of great help for the last six months now and I enthusiastically recommend anyone with any type of skin ailments to try PureBiotics.

David Tamari, M.D.
Bal Harbour

First Name: Natalia

Last Name: Vulf

Title: Dental Hygienist

Tell Us How We Can Help: Hello. Thank you very much again for the sample of StaBiotics "Water Plus" to test. After we saw how well it worked, we are using it on an every day basis now. It is also great for my Nightguard (which is perfect, because a lot of my patients are using retainers or Nightguards.

The problem is that retainers and other appliances that are used daily in the mouth are difficult to clean and keep them from having buildups and stains. Many people clean them with soap and water or a toothpaste as other products seem to harden them or change the color... But after a while, the plastic appliances are turning brownish-yellowish, because it is not perfectly solid material.

So, I think it is whole new avenue for the PureBiotics to be used for cleaning of Removable Dental Appliances... Please, let me know, when new labels are on. I need more product. The StaBiotics works great, I like it very much and want to use it to help our patients.

Natalia Vulf, R.D.H., Smiles by Design

Lino,

I wanted to tell you about my experiences with PureBiotics.

I was originally using it on my bed for allergies. Which after 25 years of waking up stuffy I now wake up almost perfectly clear in nasal area.

After using the spray on my bed for a few weeks I decided to try it on my face and body.

Since I have been a young kid I have battled acne. What happened next was amazing. After a week or two my skin starting clearing up on my face and body, not only did it clear the acne up it made my skin baby smooth.

I then took over a car via a lease and the old driver was a smoker. I tried using the spray in the car and in a matter of a couple days the odor was gone.

So to recap I used the spray to take away smoke smell, to kill allergies in my bed and to also clear acne. I'd say PureBiotics is like WD-40 for humans, a real jack of all trades!!

Thanks again for this wonderful product that has helped me so much.

Jon Z

Matt Boon, from the Australian Armed Forces, who has returned from tours of duty in the Middle East where his outfit is part of the coalition alongside of America’s forces found that using StaBiotics ALLERGY FREE Spray has “Really helped with my allergies.”

Boon, who is just back from deployment, is currently on a visit with his Army mates to the States covering from LA to Miami and while in Miami contacted PureBiotics’s Miami office for more StaBiotics Spray and the Company was proud to donate all products the men could carry.

From: Brandi Wheeler **To:** Lino@ **Subject:** !!

THANK YOU...! We love PureBiotics so much after trying those first two cans in December that we had all our friends try it and that is the reason we ordered another 48 cans.

Also, after using PureBiotics, my massage therapist, Gretchen Hall, is loving her clear skin and has gotten so many compliments on it and will now sell PureBiotics to all her clients.

I will have all the people using PureBiotics send you letters as to their results as well as my mother’s doctor. I told everyone to call you directly to place their orders..

**Regards!
Bran**

From: Alex Gilles **To:** GH **Subject:** StaBiotics For Alex **(ALEX IS A STUDENT AT USC)**

Ever since using the Stabiotics my allergies have cleared up notably. Every night I used to wake up coughing violently. Now I have not woken up from coughing in over two months.

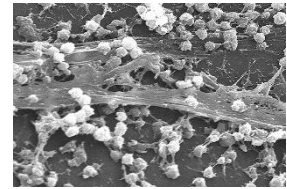

I also used to have frequent bloody noses, but have since using StaBiotics, I have had very few. I have let two of my friends, who were also having allergy problems, use StaBiotics and they both have had no problems since using it. Overall StaBiotics has been a great decision.

RADISSON SAS HOTEL– in order to strongly reduce the harmful effects of pathogens and dust mite allergens at the RADISSON SAS HOTEL BRUSSELS, a comparative study was performed to verify the potential of the Allergy Free Spray to create a safe and healthy microbiological environment on the beds of the hotel. In the performed case study, 2 rooms of the **Radisson SAS** hotel (Brussels) were treated during 1 month with the probiotic Spray and microbiologically monitored by **Ghent University** and **Avecom**. Comparison was made with 2 similar rooms, subjective to the regular cleaning, and the difference was up to 80% less dust mite allergens in the first ten days.

MEDICAL INSTITUTE OF OSTRAVA

Independent effectiveness trial of probiotic cleaning products
 Research conducted by Mgr. Kateřina Matějová, RNDr. Erich Pazdziora, CSc.,
 RNDr. Věra Toršová, CSc., Medical Institute of Ostrava, Partyzánské nám. 7, 702
 00 Ostrava, Czech Republic - Introduction: We have been presented with a new
 concept in healthcare cleaning, based on the combined action of probiotic bacteria,
 enzymes and green detergents by StaBiotics (see full report of benefits)

KFC – Kentucky Fried Chicken – YUM BRANDS and Pilgrim’s Pride

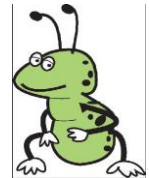

The owners of the KFC restaurants where PureBiotics was so successfully tested were so delighted with the results plus due to what PureBiotics’ StaBiotics can do reduce the costs for growing chickens, PureBiotics was then introduced directly to Pilgrim’s Pride (one of the largest growers in the world) who have great interest on their part to use PureBiotics not only for the production (growing) of chickens, but also in the processing and packaging plants.

Daniel M. Yagoda, VP KFC purchasing group and owner, J&D Management Corporation

I Over Night Soak for toothbrushes, brushes, picks, gum probes and retainers. I soak my retainer in it and have far fewer canker sores. I used to get canker sores all the time from that dang retainer.

D. Ziegler

Bob Russ’ two kids had ear tubes stopped up with constant infections to the point they were going to operate when he tried StaBiotics to clean them with and after a few weeks the doctor told him they no longer needed to be operated on. When can you came up and talk the doctor who now wants to meet you about using StaBiotics. Also the two hospitals up here loved the ideal of using “PUREBIOTICS CERTIFIED FLOWERS” as safe for hospital use.

Brenda Beasley, Beasley’s Flowers

WE WILL KEEP EXPANDING THIS LIST TO ADD MORE EXAMPLES FOR YOU

This first group of report of PureBiotics’ users should provide a good example of some of the different types of applications for PureBiotics’ StaBiotics.

As it is easy to grow this section into hundreds of pages and an ongoing “book”, we will soon format these examples in separate books to better fit the interests of what areas you the readers find of interest, like by pets, cleaning, etc.

Planned are books of ten to twenty pages each where each book will cover only letters and reports for one area of use – such as the use of PureBiotics for homes. Another book of ten to twenty pages will be for Dogs, one for Cats and one for fish and other types of pets, such as birds and exotics.

The books for farm animals will be broken up by books for each type of animals along with complete instructions on usage, one for Chickens, one for Horses, one for Hogs and then all other type animals, such as sheep, exotic and zoo animals, etc. will be grouped into a separate book.

Additional books will be for Hospitals and Medical Facilities, for Food Production Facilities and one for Restaurants, of course...! Other applications will have their own sections and we will show more details with each book for each subject as well as these reference books can then be part of manuals for each group of separate interests.

To save space, we will also provide additional lists of names of users and types of applications with one line for each as it takes too much room to provide photos and write ups and copies of all the letters we get. These lists of users will range from individual users that report special applications by names of companies and on to a total range of customers.

Please send us any and all of your comments as well as your stories and photos of your use of PureBiotics products.

Thank you...

LGM

PureBiotics has the ability to now make history by helping to make our world a better and safer place to be known for...

... DOING WELL BY DOING GOOD...!
