

Report from James Cutter: **RICHARD SCHEUFLER'S MRSA CASE – CONFIDENTIAL –**

Here are a series of photos on Richard Scheufler's MRSA outbreak (see below):
For the full information see the complete case study.

JUN 30th, 2017 - BEFORE WITH OVER TWO WEEKS OF ANTIBIOTICS

Below are three of the many infection sites on RS's body and visible are the puss drainage of the ongoing infections being cleaned and treated daily by a nurse and packed with with a strong antibiotics dressing, but which did not get better and

appeared to refuse to heal

JUL 5th, 2017 - AFTER PICTURES OF FIVE DAYS OF CLEANING WITH PUREBIOTICS:

From Richard Scheufler. "I'm starting to feel like normal. I have more energy today and really no pain other than when changing the dressings on the wounds".

As you can see, by switching to cleansing with PureBiotics, in a short period of time of just a few days, the wounds at the infection sites that were visibly red with infection and oozing a great deal of green puss, rapidly started healing and closing up. The deep holes were still packed with gauze, so they would heal from the bottom up instead of closing over a hole, but the PureBiotics were used to soak the gauze instead of the antibiotics that were not producing results and were a cause for great concern when there was no healing. Above is the 5th day.
